

SOLUTRANS

A TRADE-SHOW FOR ALL THE ROAD AND URBAN TRANSPORT SECTOR

SOLUTRANS' success is due to the total involvement of the whole transport sector since 1988. Industrial vehicles (IV), and light commercial vehicles (LCV) manufacturers, IV and LCV bodybuilders, semi-trailers and trailers manufacturers, equipment suppliers, service companies, haulage companies, transport solutions users, distributors, dealers, leasing companies...

In 2007, SOLUTRANS gathered 850 exhibitors and welcomed 28 000 visitors.

All those professionals have the same goal: promoting all the best solutions adapted to the new business and environment framework of road and urban transport.

In 2009 SOLUTRANS will focus on the crucial role of LCV for responding to public transport and goods distribution in urban areas.

For five days, and under a single roof, Solutrans gathers a comprehensive international offering of products, services and technologies to improve the logistics chain in road and city environments by boosting its effectiveness and competitive edge at all levels.

TRUCK & BUS WORLD FORUM

The Truck & Bus World Forum gathers professionals and decision makers in an open international forum to exchange cutting-edge strategies and technical information, address industry issues and challenges to develop sound business solutions to keep on developing better transport solutions for a better life.

The Truck & Bus World Forum is supported by the Rhône-Alpes Region, Grand Lyon, Drire, ERAI, Lyon Urban Truck & Bus cluster, INRETS, IFP, Chamber of Commerce of Lyon, Renault Trucks, Irisbus, Rhodia and Inoplast.

The forum core values are:

Forwarding looking analysis: the Truck & Bus World Forum intends to address international stakes related to public transport and goods distribution.

Networking of international top executives. The Truck & Bus World Forum gathers in an interactive way: worldwide corporate leaders from the Truck & Bus manufacturers, automotive Tier 1 & 2 suppliers, key decision makers involved in the policies of displacement, private companies taking care of public transportation, experts from international bodies, academic researchers in economy, technology and social sciences.

Think and Do Tank. The Truck & Bus World Forum intends to favour concrete actions and strategies to be implemented to develop sustainable transport solutions.

SAE INTERNATIONAL

The inaugural SAE 2009 Truck & Off-Road Global Summit focused on "Improving Efficiency and Reliability through Electronics" will bring together engineering executives, management and practitioners, as well as government representatives. Technical presentations and panel discussions will focus on electronics technologies and solutions relative to heavy- and medium-duty trucks, busses, construction, agricultural, mining and industrial equipment and vehicles. Topical areas under consideration and development for the Summit include: safety, emissions, security, operations and more. This unique event has significant networking and social functions built into the program to allow for maximum discussion and exchange of ideas on how to best address the technical challenges facing this industry.

SAE International is a leading provider of technical resources for on- and off - highway vehicle and equipment engineering professionals. SAE's exhaustive library of credible and reliable technical offerings includes papers, publications, conferences and exhibitions, and continuing education programs on such essential topics as powertrain, emissions, fuel efficiency, safety, and reliability.

A key player in Commercial Vehicle standards development, SAE provides many of the industry's most important global standards to ANSI and ISO and is ready to meet industry's need for globally harmonized solutions with a full suite of standards capabilities.

Look to SAE's strong standards development position and extensive menu of technical and engineering information as a vital source of mobility connections throughout the world

WORLD TRANSPORT WEEK: SYSTEMIC APPROACH FOR SUSTAINABLE TRANSPORT SOLUTIONS

In an increasingly globalised and competitive world, the economic, social and environmental demand for freight and public transport in urban areas continues to increase every year.

Meanwhile, energy shortages, pollutant emissions and city congestions are getting worse and worse.

Vehicle manufacturers, operators, cities and legislators must contribute more than ever to the global reflexion on these issues, aiming at developing optimized and efficient vehicles and transport systems solutions to respond to both increasing economic demands and sustainable development issues.

In that context, **SOLUTRANS** trade show, the **Truck & Bus World Forum** and the **SAE International** decided to launch the first edition of the World Transport Week in Lyon from 11th till 16th of May 2009. The **Truck & Bus World Forum** will offer forward looking analysis

related to public transport and goods distribution. **SOLUTRANS**, major European trade show related to transport solutions, will gathers a comprehensive international offering of products, services and technologies. **SAE International** will offer forward looking conferences related to Commercial Vehicles with a special focus on "Improving Efficiency and Reliability through Electronics".

Solutrans, the Truck & Bus World Forum and SAE International are glad to welcome you for the first edition of the World Transport Week.
